

Chicago Screws Stainless

Chicago Screws make a great fit for most DIY projects. These binding screws are crucial for many people in the medical, food, and entertainment industries. Originally created and used within the bookbinding industry, the adaptability and usefulness of these screws has greatly increased their popularity.

Chicago Screws

Although Chicago screws were created initially for bookbinding, they are now found on a wide variety of products including architectural displays, spearguns, and other products that require fasteners. The screws allow for easy disassembly if necessary, yet hold tight until ready for removal.

Stainless steel screws and screw posts are available with exposed parts in black for an extra charge of \$9.00 per 100 sets.

The male (screw) portion of each set has a slotted head, while the female (post) comes unslotted unless marked blind. Blind screws allow for a seamless appearance by avoiding drilling completely through, allowing the screw bottom out. If ordered blind, product will ship with a shorter screw.

Our locally made inventory grows every week based on the demands of our customers. We have already created products never seen before and will continue to do so as needed. We aim to provide excellent service and satisfaction for everyone.

In the small sizes, chicago screws are normally drilled and tapped right through in order to let the screw bottom out. Some folks prefer not to see that hole, so in the blind version we produce posts that are not drilled completely through. However, this does not allow enough room for the normal screw so they are shipped with a shorter screw.

Aluminum Chicago Screws

Post Head Diameter: 0.4 in.
Barrel diameter: 0.2 in.
Screw Head diameter: 0.4 in.
Threading: 8/32

The male (screw) portion has a slotted head. The female (post) head is unslotted. The 3/8" and smaller length posts have a hole in the post head to accommodate the length of the screw.

The 3/16", 1/4" and 3/8" posts are available blind (no hole). These require a shorter screw.

Prices- Zero" - US \$15.82

Real Brass Chicago Screws

The team at ChicagoScrews.com is proud to introduce our selection of real brass Chicago Screws, T nuts screws and posts. We have several sets of brass screws available with exposed parts in black, male slotted heads, and female unslotted heads. These screws have a post head diameter of .435 inches, a barrel diameter of .186 inches, a screw head diameter of .435 inches, and a threading size of 8/32.

We also offer blind versions of some of our real brass screws, which you may find ideal depending on your preferences. Although Chicago Screws are normally drilled and tapped through to let the screw bottom out, some people do not want to see the hole. By taking advantage of the blind version you will not see the screw, however, this does not allow enough room for the normal screw. To compensate, we ship our blind screws with a shorter screw.

If you would like to learn more about our brass screws, contact the team at ChicagoScrews.com! Browse our complete size listing below, and place your order online today!
